reassembling the social is a fundamental challenge from one of the world's leading social theorists to how we understand society and the social. Bruno Latour's contention is that the word social as used by social scientists has become laden with assumptions to the point where it has become misnomer when the adjective is applied to a phenomenon it is used to indicate a stabilized state of affairs a bundle of ties that in due course may be used to account for another phenomenon but Latour also finds the word used as if it described a type of material in a comparable way to an adjective such as wooden or steely rather than simply indicating what is already assembled together it is now used in a way that makes assumptions about the nature of what is assembled it has become a word that designates two distinct things a process of assembling and a type of material distinct from others Latour shows why the social cannot be thought of as a kind of material or domain and disputes attempts to provide a social explanation of other states of affairs while these attempts have been productive and probably necessary in the past the very success of the social sciences mean that they are largely no longer so at the present stage it is no longer possible to inspect the precise constituents entering the social domain Latour returns to the original meaning of the social to redefine the notion and allow it to trace connections again it will then be possible to resume the traditional goal of the social sciences but using more refined tools drawing on his extensive work examining the assemblages of nature Latour finds it necessary to scrutinize thoroughly the exact content of what is assembled under the umbrella of society this approach a sociology of associations has become known as actor network theory and this book is an essential introduction both for those seeking to understand actor network theory or the ideas of one of its most influential proponents
